## SCIENTIFIC MISCELLANY.

Hypnotism is a new name for old phenomena. heing practically identical with what was called mesmerism a few years ago. It is practised in nearly all countries by a few medical mee, and now claims at least four monthly papers—two in as regards the supply of water to the closets see my standard gauge (4 ft. 85 in.) has been built from Paris, on in Berlin, and one in Florence, Writng on the "new mesmeriam," a correspondent of the London Times states that there are among hypnotists four distinct schools of practice and thought. The first embraces those hypnotists who have satisfied themselves of the reality of the phenomena, but who decline to practice hypnotism therap utically because they believe it will do more harm than good The distinguished Charcot, to whom the scientihe study of the subject is chiefly due, belongs to his school. He believes that the hypnotic condition depends upon a disordered brain, and that ts employment is only rarely justifiable, as, for nstance, to dispel the mania of a hysterical patient. The next may be called the retrograde school, whose headquarters are at the Charity lighters which will be towed to Hankow by two Hospital in Paris. It uses every variety of hypnotic procedure for a great variety of disorders. but tends to revert to the magnetic practices. theories and my teries of Mesuner's day: The third school includes all the hypnotic practitioners who believe sleep and suggestion to be an important treatment for a number of nervous disorders. The fourth school seeks to develop the mental side of the problem, and to crowd out the hypnotism in favour of a natural action of a healthy or superior mind on a morbid or inferior one. This, however, is not hypnotism. The reality of a hypnotic condition is no longer matter of doubt, but some phonomena claimed for that state may be questioned. The Charity Hispital has reported wonderful results from the transfer of disease from one person to unother, from the touching of scaled tabes coutrining drugs and from the influence of magnets on sensitive patients. The responsible position of Dr. Luys has given much weight to these experiments. Careful critics have now proven. lowever, that the tests applied by Dr. Luys have been very imperfect, and that he has, at least in many instances, fallen a victim to trickery v his patients.

The motion of supply being brought forward Mr. Lockwood referred to the case of Dr. Briggs, formerly on the staff of Lord Counemora, and said that the doctor was willing to apologise for his letter written to the Army and Navy Gazette on 4th June last. Mr. Campbell-Bunnerm in said that if Dr. Briggs apologises ne will be reinstated in the service. Mr. Campbell-Bannerman, in his statement on the Army Estimates, said the only way to

equalise the buttalions in Great Britain and abroad was to bring some home. It was impossible to reduce the strength of our Army in India and he defers the mestion as to whether India is able to space two or three cadres. He then went on to say that it was the intention of Government to withdraw one buttalion from Gibraltar and that the original intention was to withdraw one from Egypt and substitute a battalion of the Guards, but recent events in Egypt provented these changes. It had been decided, he said, to abandon the Army Corps system i foreign service and to hold a field of 20,000 mon ready instead.

IMPERIUL QUARTO: ANGELSH AND CHINESE DICE TONARY. WITH THE PURTI AND MANDARÍN

PRONUNCIATION. An Anglo-Chinese Dictionary, published at the Daily Press Office, Hongkong. For comprehensiveness and practical sorvice this Work stants unrivalled. All the new words which the Chinese have of latev ears been compelled to coin to express the numerous ob jects in machinery, photography, telegraphy. and in science generally, which the rapid advance of foreign relationships imposed upon them, are here given in extenso. Each and every word is fully illustrated and explained, forming exercises for students of a most instructive nature. Both the Court and Punti pronunciations are given the accents being carefully marked on the best principle hitherto attained. The typography displays the success of an attempt to make the

Chinese and English type correspond in the size of body, thereby effecting a vast economy of space, achieving a clearness not previously altained, and dispensives with those vast marvins and recent spaces which have heretofore characterized Chinese imblications.
